CASE STUDY

Project: Inspired
Location: Derbyshire
Hire Period: 3 years

Overview

Inspired Entertainment, a gaming technology company, supplies content, platform, and other products and services to regulated lottery, betting, and gaming operators worldwide. The company operates through four segments: Gaming, Virtual Sports, Interactive, and Leisure.

Having a permanent warehouse premises at Beeches Park in Burton Upon Trent, Inspired needed to increase their office space in order to expand.

Our Solution

Pickering's safely delivered and installed five Prima 8 modules on site to form a modular building complex creating an open plan office and meeting room space which was prepared at their local depot in Measham.

The temporary building solution enabled the Inspired Burton-based warehouse expansion plan to house a planned increase in office staff, offer a professional meeting space and create more area in the warehouse for production.

New furniture and carpet fitting from our Pickering's+ range were included to create the ideal office space. David, the Operations Manager, is very happy with their temporary facilities which are scheduled to remain on site for 3 years.

*"I am very pleased with the project overall. Pickering's did a great job, no job was too much hassle and any issues were resolved quickly by the install team. The building looks as though it has always been there."
- Operations Manager*
