# CASE STUDY

**Project:** Willett Food Projects Ltd  
**Location:** Coventry  
**Hire Period:** 42 weeks

## Overview

Willett Food Projects Ltd are dedicated to supporting food companies in the development and expansion of their processing and facilities.

Upon enquiry they had signed contracts and were taking possession of a new industrial unit near Coventry from a Construction company and were in need of office space and welfare to accommodate a management and fitout team of up to one hundred people.

## Our Solution

The customer advised that due to the project being high end, they would prefer a modular building. Therefore the order was passed to our modular specialist team to showcase the benefits and to undertake a site visit to better understand their requirements.

Pickering's safely delivered and installed sixteen bays from our Prima 8 range consisting of offices, a canteen, toilets, a drying room and meeting rooms.

The temporary building solution will allow Willett Foods to successfully support their customer while being able to be available on site while they are required.

This order was accompanied by additional Pickering's+ items including; fire alarm systems, air conditioning and emergency lighting.

**“The units were successfully installed and I would like to say thank you to the fit out team, they were diligent in their duties and worked safely and they are an asset to your company”**  
- Construction Manager
